

ONE STEP

Hydrogen peroxide system for soft and RGP contact lenses in combination with neutralizing tablets. The hydrogen peroxide solution provides highly effective microbial cleaning and disinfection, making it effective against microbial contamination.

The neutralizing tablets, with a natural colour indicator, neutralize the hydrogen peroxide, resulting in a pH-neutral, preservative-free solution. The tablets contain no animal-derived ingredients.

PURPOSE

Cleaning and disinfecting, neutralizing, storage and inserting for all types of contact lenses.

BENEFITS

- For soft and RGP contact lenses
- Preservative-free
- High antibacterial action
- Tablets do not contain any animal or toxic ingredients
- Ideal comfort when applying and wearing due to PVP

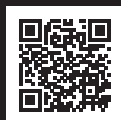

COMPOSITION

Hydrogen peroxide solution: Hydrogen peroxide, Phenacetinum crystallinum, Sodium chloride, PVP K30 EP, purified water

Neutralizing tablet: Boric acid, Potassium pentaborate, Polyvinyl alcohol, Vitamine B12, Microbial catalase

AVAILABLE IN

- **100 ml Pack**
(1 x 100 ml + 15 tablets + Lens case with disc)
EAN - 8717185940114
- **360 ml Pack**
(1 x 360 ml + 45 tablets + Lens case with disc)
EAN - 8717185940121
